## The Premier Full-Text Resource for Food Industry Research and Practice

This extensive full-text database is designed to support the informational needs of the food industry at all levels. It offers cover-to-cover content for thousands of publications all directly dealing with food industry-related issues.

### Designed for Industry Professionals of All Types

More than 1,000 key food industry and market reports are included, as well as tens of thousands of additional food industry articles, benchmarks and best practices, selected from thousands of trade and industry publications. Designed for food industry experts and information professionals of all types, *Food Science Source* offers the foremost full-text collection of food industry-related content available today.

### Expert, Comprehensive, Informative and Convenient

Provides users with access to vital information from numerous industry-leading sources while offering unmatched coverage integral to all aspects of food science, nutrition, and related areas. This database also provides quick access to critical information, including complete full text with images, tables, charts, and other graphical content from many key titles. It also includes benchmarks and best practices, providing examples of food science-related practices and developments from a world-wide range of industry players.

### Content features include:

- Hundreds of thousands of records with subject headings from an extensive thesaurus
- Full-text coverage of many sources including journals, monographs, magazines and trade publications
- A wealth of key food industry and market reports

“ My overall impression of the EBSCOhost interface is that it offers something for everybody. ”
